

# South Routt Library District Web Accessibility Policy and Statement

## 1. Mission Statement

The South Routt Library District offers online platforms to further its mission of enriching the community with library services which encourage reading and learning, along with providing accessibility to information for all.

## 2. Purpose

The Web Accessibility Policy, approved by the South Routt Library District Board of Trustees, on June 5, 2024, outlines our philosophy and guidelines to meet Web Content Accessibility Guidelines (WCAG) 2.1 AA by July 1, 2024, and WCAG 2.2 AA by July 1, 2025, as mandated in Colorado House Bill 21-1110.

## 3. Scope

The Library District is committed to delivering digital experiences that work for all users under all circumstances. We will forever be committed to this journey, as we value each visitor's access to web content produced by the Library. This includes southroutt.colibraries.org websites, district documents and the content found within our digital archive.

This standard does not apply to web content or district documents produced by the Library before July 1, 2024.

## 4. Compliance

The Library will review all areas of Library-produced web applications and web content on an ongoing basis. In our commitment to transparency, we make the last three months' reports available to the public. The Library has also created a compliance plan to meet the July 1, 2024, deadline. All compliance documentation is available.

### *Compliance Officer*

The Library has designated Crystal Rodgers, as its compliance officer for website disability-related accommodations. The compliance officer has received training in website accessibility and, along with the CO State Library, maintains Library-produced web content per WCAG 2.1 AA best practices.

## 5. Report an Accessibility Issue

Should a visitor need help accessing Library-supplied web content, please contact us. We will respond with feedback to your submission and ensure proper steps are taken to address the problem. Please be specific when describing the information you seek or the problem you encountered. If we cannot resolve the problem due to an issue stemming from a third-party content provider, we will work to assist you with reading and accessing content on these platforms.

To report an accessibility issue to the District's Compliance Officer:
